

Are You Ready to Bare Your Body This Spring?

It may seem like winter will never end, but it will. Spring is right around the corner. That means flowy dresses, skirts, shorts and more body baring clothes! Are you ready to wear all of the form fitting outfits that have been hiding behind those chunky sweaters? If even the thought scares you because your body just isn't in the shape you'd like it to be, don't worry. Skin Laser & Surgery Specialists have teamed up with top notch board-certified plastic surgeon Dr. Chang Soo Kim to help you achieve your aesthetic goals!

Whether you are looking for fuller, more perky breasts or to lose fat permanently through liposuction, Dr. Chang Soo Kim can provide you with the knowledge and experience that is necessary to achieve the results you desire. Performing a full breadth of plastic surgery procedures, Dr. Kim is especially esteemed in cosmetic surgery revisions; fixing the wrongs of previous surgeries performed by other surgeons.

Looking to Give Your Skin a Healthy Boost?

Neocutis Bio-restorative Skin Cream with PSP packs one powerful punch, providing the most complete and balanced combination of human growth factors available today.

Dr. David Goldberg's research showed that when women applied this cream to their face for 6 months, aging skin looked healthier and shinier. When biopsies were performed on the treated skin, new healthier collagen was noted to be induced by the foreskin derived growth factors in the cream.

If you are looking to revamp your skin care routine, visit one of our aestheticians to see if this product is right for you.

Patient Success Stories

Claudia came to Dr. Goldberg after being involved in a car accident a few years ago. Her face had significant crusting, multiple unhealed areas, outward rolling on her lower eyelids, redness and inflammation over most parts of her face. All needed repair. Dr. Goldberg first repaired her skin using the Pulsed Dye Laser and continued with several treatments of various lasers, and LED devices. After these sessions Claudia's skin showed significant improvement. Claudia could not be more satisfied with her results. "Dr. Goldberg saved my life, I do not know what I would have done if he hadn't helped me."

Ask the Expert

Question: I am 31 and have acne, mostly pimples and blackheads. What is the best treatment for my age and condition?

While treatment depends on a lot of factors, including severity of acne and skin type, you would probably benefit from a topical medication called a retinoid. This medication not only helps treat and prevent acne, but it also is great for anti-aging. There are other topical medications that are very effective as well as oral antibiotics. Alternatively, there is a great treatment using light therapy in combination with a vacuum called Isolaz. This usually requires multiple quick and painless treatments that have shown to be quite effective. Finally, a healthy lifestyle is always a good place to start to make your skin look it's best. Stress and poor diet often manifests itself through the skin. Make sure you eat well, sleep well, and manage your stress.
